Our programs for people with developmental disabilities take a person-centered approach, weaving together tailored solutions so each person can live their best life. Our programs provide the opportunity for them to choose where and how they live, form meaningful relationships, explore employment, engage in their communities, and maintain good health. The Foundling offers residential, day, and community programs for people with developmental disabilities in Staten Island.

RESIDENTIAL SERVICES
The Foundling operates residences for adults, with options for people of varying support needs - from 24/7 staffed homes to independent apartments in the community. Our person-centered approach helps achieve meaningful outcomes, as our staff works with each resident to promote independence, teach daily-living skills and self-advocacy, and practice effective communication. Each person is supported by a team of trained staff, including Direct Support Professionals, Nurses, Behavioral Specialists, and our Nutrition and Program Quality Teams.

DAY HABILITATION
The Foundling’s Day Habilitation program provides structured activities for adults in a fun group setting, allowing them to develop social, interpersonal, communication, work, and problem solving skills. We operate a community-based Without Walls (WOW) program at our Staten Island headquarters, located on the North Shore at 1 Edgewater Plaza, which offers participants the ability to integrate into the neighborhood through person-centered activities that are based on their own wants and needs - from outings to parks and attractions, volunteer days at local organizations, and more.

COMMUNITY HABILITATION
The Foundling’s Community Habilitation program provides skills training to assist children and adults in maximizing their potential for independence. A trained Foundling specialist works with each participant through one-on-one sessions in their homes or surrounding community. Together, they work to meet goals set by the participant and their family. This can include social skill development, community inclusion and relationship building, practice with activities of daily living, and educational assistance.
